Poland

At the rate they are now deporting Poles, in the next 10 years there willnot he a single Pole left in the Western part of that land. The Germans who are being brought in to replace them come from Bessarabia, Baltic states, etc. These wholesale deportations have been going on since the German occupation. As of 9/1/41 there had been more than 2,000,000 Pole deported. First the intellectuals were, then the workers.
